

THEOREM #2

SOA FUNDING OBSERVES ARCHIMEDES' PRINCIPLES

SOA Blueprint

A structured blog by Yogish Pai

- **When a solid body is partially or completely immersed in water, the apparent loss in weight will be equal to the weight of the displaced liquid.**

Whether an enterprise adopts SOA or not, the funding for IT shall remain the same, i.e. even though SOA requires upfront investment to get started, the overall cost for the enterprise over a 3 year period will be the same.

The overall funding shall be the same but the business benefits shall differ.

Enterprise need to determine whether they want to start adopting SOA or stay with the existing model resulting in rigid and redundant IT infrastructure.
